Portfolio: Data Analytics Portfolio | Adnan Bin Abdul Khaleque
Location: Dhaka, Bangladesh

Professional Summary

Data Analyst skilled in SQL, Python, Power BI, Tableau, and Excel with experience in data cleaning, exploratory data analysis, KPI tracking, and dashboard development. Experienced in transforming raw datasets into actionable insights and applying time-series forecasting and predictive modeling to support data-driven decision making.

Technical Skills

- **Programming & Analytics:** Python (pandas, NumPy, scikit-learn, statsmodels), SQL.
- **Data Visualization & BI:** Power BI, Tableau, Microsoft Excel (PivotTables, KPI Dashboards, Charts).
- **Analytics Expertise:** Data Cleaning, Exploratory Data Analysis (EDA), KPI Tracking, Business Intelligence Reporting, Predictive Modeling.
- **Machine Learning:** Regression, Time Series Forecasting (ARIMA, ML models)
- **Other Tools:** SAP (Planning), Basic Knowledge of MySQL.

PROJECT EXPERIENCE

Energy Transition Forecasting – Time-Series Analysis (Python)

- Conducted comparative analysis of statistical and ML-based forecasting models to predict energy demand trends.
- Performed data preprocessing, feature engineering, and model evaluation using MAE and RMSE metrics.
- Applied predictive modeling techniques to support long-term energy planning insights.
- Documented findings as part of a research conference paper.

Sales Performance Dashboard – Tableau

- Designed interactive dashboards tracking 10+ KPIs including sales, profit, quantity, and customer metrics.
- Built year-over-year and weekly trend analysis to identify performance patterns.
- Implemented dynamic filters (category, region, product subcategory) for stakeholder-driven analysis.
- Enabled executive-level performance monitoring and decision support.

Layoffs Data Analysis – SQL

- Cleaned and transformed raw layoff datasets using SQL queries.
- Conducted exploratory data analysis to identify industry and time-based trends.
- Generated structured insights to highlight workforce and economic patterns.

Customer Churn Analysis & Prediction Dashboard – Power BI

- Analyzed 7K+ customers to identify key churn drivers; observed 26.5% churn rate.
- Built an interactive dashboard highlighting trends and ~$139K monthly revenue at risk.
- Developed a predictive model (77.2% accuracy) to identify high-risk customers and support retention strategies.

Certifications

- AI/ML/IoT Bootcamp – ICT Division, Government of Bangladesh | IEEE CS GUB.
- Introduction to Data Analytics – Google Cloud (Issued by NetCom Learning).
- AI+ Prompt Engineer Level 1™ – AICERTs (Valid through October 2026).

ACHIEVEMENTS

Runners-Up – University Project Showcasing Competition

Smart Toll Collection System using RFID Technology for Automated Vehicle Detection

Education

B.Sc in Electrical and Electronic Engineering

Green University of Bangladesh, Dhaka.

Graduation Year: 2026
